## BioFuture 2026 isn't just a conference—it's where breakthroughs are born, connections are forged, and the next chapter of healthcare innovation begins.

This year, BioFuture introduces a transformative structure for company presentations, designed to foster meaningful interaction between innovators, investors, and strategic partners. Whether presenting as a growth-stage company or a seed-stage founder, participants will benefit from a format that prioritizes clarity, context, and connectivity.

Every company attendee enjoys full access to our exclusive one-to-one partnering system. This fee includes access for one (1) presenter, and one (1) company employee.

## New Format: Spotlight Panels Built for Engagement and Depth

At the heart of BioFuture 2026's company presentations are **Spotlight Panels**—dynamic sessions that replace standalone pitches with interactive, multi-part experiences:

### 5-Minute Company Introduction

Each participating company begins the Spotlight Panel with a concise, high-impact overview. Presenters introduce their mission, innovation, and market potential in just five minutes to a room of engaged stakeholders.

### Moderator-Led Panel Discussion

After introductions, an expert moderator guides an in-depth conversation among the panelists. This discussion draws out insights about value drivers, commercialization strategies, sector challenges, and future outlook—helping attendees compare and contrast approaches within key themes.

### Interactive Q&A

Each panel concludes with a live audience Q&A, engaging top-tier investors, pharma executives, and potential partners in direct dialogue with presenters—an effective catalyst for meaningful conversations and new collaborations.

This **Spotlight Panel** approach creates a richer environment for both presenters and audiences, combining visibility with depth and positioning each company within a collaborative, content-driven exchange.

## Seed Stage Presentations: Fast-Paced Format + Expert Insight

BioFuture's dedicated **Seed Presentation Sessions** provide early-stage ventures with focused exposure and value-added feedback:

### 5-Minute Pitch

Each founder delivers a focused, five-minute presentation highlighting their vision, core technology, and market positioning.

### Live Expert Feedback

A panel of investors and industry leaders provides immediate, candid feedback—offering presenters valuable insights to help shape their growth strategies.

Eligibility: Seed sessions are open to companies with less than \$2 million in funding, under three years old, and fewer than five employees.

## TechBio Spotlight

Meet the Companies  
Revolutionizing Drug  
Discovery & Healthcare  
through the Convergence of  
Technology & Biology

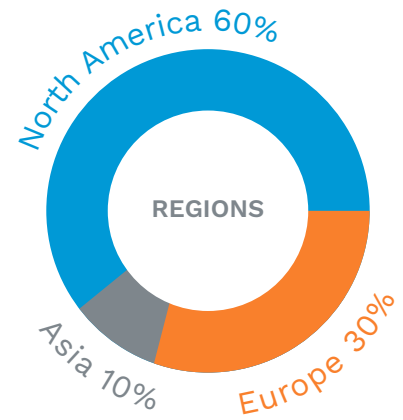

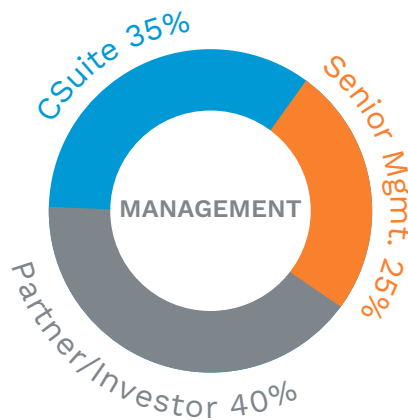

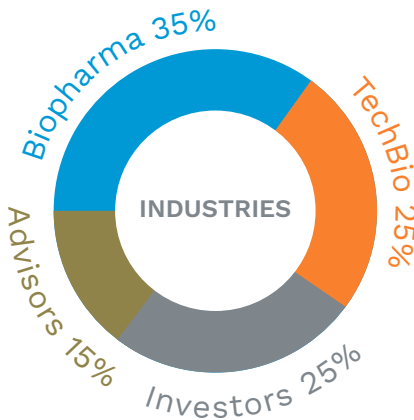

Unscripted conversations. Genuine connections. The right investors.

### Who You Will Meet

Meet today’s most prominent executives and investors, provocative thought leaders, and visionaries in healthcare and technology. Interact with those driving healthcare forward, including top tier investors, VCs, pharma and collaborators by presenting your company, engaging in plenary discussions, and participating in one-to-one meetings and networking receptions.

**500+ ATTENDEES INCLUDING: BIOPHARMA, LIFE SCIENCE, KEY ADVISORS, AND TOP-TIER INVESTORS & VCS**

**50+ INNOVATIVE COMPANIES WILL BE PRESENTING THEIR GAME-CHANGING TECHNOLOGIES & THERAPIES**

### Benefits of Presenting

#### CONNECT WITH YOUR AUDIENCE

- Receive full access to BioFuture networking and programming
- Schedule one-to-one meetings
- Hear from industry rockstars about the future of biopharma and medicine
- Access unique networking opportunities
- Hear presentations from today’s most innovative companies
- Attend workshops on cutting edge topics

#### NETWORKING AND SCHEDULING

Meet with potential investors and collaborators at BioFuture through onsite networking and with our easy to use one-to-one meeting system. Access to the scheduling system will be provided to all attendees upon registration.

#### HIGHLIGHT YOUR COMPANY

Maximize your visibility with a sponsorship opportunity or tabletop exhibit. Contact Lila Taylor at [PresenterInfo@demy-colton.com](mailto:PresenterInfo@demy-colton.com) for more information.

## TechBio Companies: Embedded in the Spotlight

Innovators working at the intersection of biology and technology—including AI-driven discovery, digital biology, and computational therapeutics—are fully integrated within the **Spotlight Panels**. There is no separate track for TechBio; these presentations play a vital role in the broader narrative of next-generation health, enriching discussions and shaping cross-disciplinary progress.

## Qualified Company Categories

**Spotlight Panels for public and private companies, as well as Seed Presentation slots, are open to qualified innovators across all therapeutic categories. Eligible categories include:**

- Small and Large Molecule R&D Therapeutic
- Platform Technologies
- Tool Development
- Drug or Device Delivery
- Molecular Diagnostics & Personalized Medicine
- Research-Focused Service Providers
- Digital Medicine
- Artificial Intelligence (AI) & Machine Learning (ML)
- Medical Devices
- TechBio

This inclusive approach ensures a comprehensive view of the innovation landscape and fosters genuine cross-pollination among diverse innovators and stakeholders.

## In summary

BioFuture 2026 sets a new standard for company presentations through its **Spotlight Panel** and **Seed Presentation** formats. Engaging, carefully curated, and built for real-time feedback, these formats give presenters not just visibility—but also the insight, investment, and partnership opportunities needed to drive real-world impact. This is where ideas are introduced, elevated, and launched toward their next chapter. Companies can apply by visiting <https://biofuture.com/biofuture-participating-companies/> pricing and benefit information are also linked to this page.
